1 **INTRODUCTION**

2 The Plaintiff Missouri Commissioners argue that they are not constitutionally dis-  
3 abled or statutorily preempted from enforcing their subpoenas, because they are engaged in  
4 nothing more than a routine investigation into alleged violations of state privacy law. They  
5 claim to be interested only in AT&T's alleged activities, not those of the NSA, as if an in-  
6 vestigation into an alleged relationship between two parties can concern only one. And  
7 they repeatedly assert that their effort to determine whether AT&T shared bulk call records  
8 databases with the NSA does not harm federal military or intelligence activities, even  
9 though the nation's most senior intelligence officials have previously sworn that the oppo-  
10 site is true, and three separate district courts, including this one, have refused to allow in-  
11 quiry into this subject.

12 Notwithstanding the Commissioners' efforts to portray their subpoenas as a garden-  
13 variety exercise of state police power, the express purpose of their investigation is – and its  
14 clear effect would be – to determine whether AT&T participated in alleged counterterror-  
15 ism activities of the NSA and, if so, the details of that participation. Each and every topic  
16 set forth in Plaintiffs' subpoena expressly concerns the NSA. *See Subpoena Ad Testifican-*  
17 *dum ¶¶ 1-5, Clayton v. AT&T Commc'ns of the S.W., Inc.*, No. 07-1187, Dkt. 1-3, at 9. In-  
18 deed, Plaintiffs admit that their investigation was “made in response to media reports” of  
19 AT&T's alleged disclosure of call records to the NSA, and they expressly assert that the  
20 investigation and “the need for judicial scrutiny” is justified by, among other things, recent  
21 disclosures of unrelated “violat[ions of] federal law [by the Federal Government] in the is-  
22 suance of national security letters to carriers seeking call record information.” Pls.' Br. of  
23 P's & A's in Opp'n to AT&T's Mot. to Dismiss (“Opp'n”), MDL No. 06-1791, Dkt. 275, at  
24 5, 19-21, & n.3.

25 The authority of the Missouri Public Service Commission to regulate intrastate op-  
26 erations of telecommunications carriers does not permit the Commission – much less two of  
27 its five Commissioners – to investigate or oversee federal military and intelligence activi-  
28 ties. Merely because Plaintiffs identify some domain of potentially applicable state law

1 hardly means that their subpoenas do not invade spheres of authority reserved to the federal  
2 government under the Constitution or federal statutes. If Plaintiffs' reasoning were correct,  
3 there would be no meaningful limit on the states' ability to use their local law authorities to  
4 superintend the activities of the federal government. This is, of course, not the law. Plain-  
5 tiffs' subpoenas intrude into exclusively federal domains, conflict with and are preempted  
6 by federal statutory and common law, and cannot be enforced under Missouri law. Accord-  
7 ingly, their lawsuit must be dismissed.

## 8 **ARGUMENT**

### 9 **I. STATE AUTHORITIES LACK POWER UNDER THE CONSTITUTION TO** 10 **OVERSEE OR INVESTIGATE ALLEGED CARRIER COOPERATION** **WITH FEDERAL INTELLIGENCE ACTIVITIES.**

11 In its opening memorandum, AT&T demonstrated that Plaintiffs' effort to enforce  
12 their subpoenas is constitutionally forbidden because the Constitution both reserves the  
13 domain of foreign intelligence to the federal government and forbids the states from at-  
14 tempting to oversee such exclusively federal activities. *See* Mot. of Defs.' AT&T  
15 Commc'ns of S.W., Inc. et al. to Dismiss Pls.' Applications to Compel ("Mot. to Dismiss"),  
16 MDL No. 06-1791, Dkt. 240, at 6-7. Plaintiffs do not, because they cannot, gainsay these  
17 settled constitutional principles. Instead, Plaintiffs offer three reasons why these principles  
18 do not apply here: (1) the cases cited by AT&T involve facts that are not identical to the  
19 facts alleged here; (2) Plaintiffs' investigation targets AT&T, and not the NSA; and (3) the  
20 investigation concerns state privacy law, and so does not concern foreign intelligence. For  
21 the most part, these arguments simply attack the factual premise of AT&T's legal argu-  
22 ments, and none survives scrutiny.

23 *First*, Plaintiffs do not seek to distinguish the holding or underlying reasoning of the  
24 numerous cases cited by AT&T. *Id.* at 6-9 & nn.7-8. Rather, they make the conclusory as-  
25 sertion that these cases do not control because their facts are not identical to those here,  
26 without explaining why those factual distinctions make a difference to the legal analysis.  
27 Opp'n at 6-7. Merely noting, for example, that this Court's decision in *In re World War II*  
28 *Era Japanese Forced Labor Litigation* involved "a California statute permitting suits for

1 compensation for World War II forced labor” is an observation without legal consequence.

2 *Id.* at 6.<sup>1</sup>

3       *Second*, Plaintiffs contend that their investigation does not concern foreign intelli-  
4 gence because they issued subpoenas to AT&T, not the NSA. *E.g., id.* at 4 (“This at-  
5 tempted investigation has been and remains very specifically limited to *only the actions of*  
6 *the six defendants*, who are private parties . . .”). In the first place, this argument cannot  
7 be squared with Plaintiffs’ admission that the subpoenas by their terms require AT&T to  
8 divulge information about NSA activities. Their sole response is that the subpoenas’ refer-  
9 ences to the NSA were “positional.” *Id.* at 4-5. Whatever that may mean, Plaintiffs cannot  
10 both expressly demand that a carrier disclose information sufficient to confirm or refute  
11 public reports that bulk call records data were shared with the NSA as part of an assertedly  
12 classified counterterrorism program, and at the same time deny that their investigation con-  
13 cerns alleged foreign intelligence surveillance. Nor would it help to edit the subpoenas to  
14 remove references to the NSA. *Id.* at 5. Deleting the word “NSA” would not change the  
15 fact that the subpoenas seek disclosure of information pertaining to allegations that AT&T  
16 shared bulk call records data to support federal counterterrorism activities.<sup>2</sup>

17       The United States has explained that compliance with the subpoenas would impede  
18 the federal government’s foreign intelligence activities by “improperly reveal[ing] intelli-  
19 gence sources and methods,” regardless of whether AT&T was or was not involved in any  
20 activities of the kind that stimulated Plaintiffs’ inquiry. Compl. ¶ 39, *United States v. Gaw*,

---

21 <sup>1</sup> Plaintiffs discuss in slightly greater detail *In re Tarble*, 80 U.S. (13 Wall) 397 (1871), fo-  
22 cusing on *Tarble*’s observation that there are “co-existing spheres of federal and state”  
23 powers. Opp’n at 7-8. They ignore, however, that in the very passage they quote, the Su-  
24 preme Court recognized that, in light of “the distinct and independent character of the two  
25 governments, within their respective spheres of action, it follows that *neither can intrude*  
*with its judicial process into the domain of the other.*” 80 U.S. (13 Wall) at 407 (emphasis  
added). Plaintiffs’ subpoenas violate the Constitution precisely because they intrude into  
the exclusively federal function of gathering foreign intelligence to prevent external attack.

26 <sup>2</sup> Nor does Plaintiffs’ new reference (Opp’n at 19-20) to the report by the Justice Depart-  
27 ment’s Inspector General identifying defects in the FBI’s issuance of National Security Let-  
28 ters (“NSLs”) alter the state-federal balance on these matters: Missouri PSC Commission-  
ers have no more authority to use state law to investigate or punish assertedly problematic  
disclosures of call records to the FBI than to the NSA.

No. 07-1242, Dkt. 1-1, at 11; Alexander Decl., Dkt. 265 Att. 1, ¶¶ 16-17, at 8-9.<sup>3</sup> The fact that an in-house economist at the Missouri PSC believes that the call records themselves are not state secrets is irrelevant, as the subpoenas do not in the main seek the call records themselves, and national security-related judgments are far beyond the institutional competence or charter of the Missouri PSC or its economists anyway. See Opp’n at 19 (citing Aff. of Natelle Dietrich, Mem. in Opp. to Summ. J., *United States v. Gaw*, No. 07-1242, Dkt. 1-71). “[I]n making assessments about the impact of [a state investigation] on national security, the [state agency] is acting beyond its depth.” *United States v. Adams*, 473 F. Supp. 2d 108, 118 (D. Me. 2007).

Plaintiffs’ argument that their subpoenas are permissible because they have nothing to do with “[i]dentifying the third parties to whom disclosure of these customer records was made” or even whether “there was such disclosure” in the first instance is erroneous as a factual matter. Opp’n at 4. How could AT&T say anything about, for instance, “[t]he nature or type of information disclosed to the NSA” and “[t]he date or dates on which [such] disclosures were made” without acknowledging whether there was a disclosure to the NSA and its approximate scope? Subpoena Ad Testificandum ¶¶ 3, 4, Dkt. 1-3, at 9. More fundamentally, the legality of third-party disclosures of call records cannot be assessed without knowing to whom those disclosures were made, under what circumstances, and under what legal authority. That would be true even if the Commissioners’ sole focus were on alleged violations of state law, because state regulation of alleged private contractors to the federal government violates the Supremacy Clause when state laws interfere with, impact, or obstruct federal operations. *Gartrell Constr. Inc. v. Aubry*, 940 F.2d 437, 439-42 (9th Cir. 1991); see also *Stehney v. Perry*, 101 F.3d 925 (3d Cir. 1996) (state polygraph statute can-

---

<sup>3</sup> Accord Letter from Benjamin A. Powell, Gen. Counsel, Office of the Dir. of Nat’l Intelligence, to Edward R. McNicholas (July 11, 2006) (“Powell Letter”), Ex. E, Dkt. 1-37, at 1 (“The subpoenas infringe upon federal operations, are contrary to federal law, and accordingly are invalid under the Supremacy Clause of the United States Constitution.”); Letters from Paul G. Lane, AT&T Gen. Counsel-Missouri and Kansas, to PSC Comm’rs Robert M. Clayton III and Steve Gaw (July 11, 2006) (“Lane Letters”), Ex. D, Dkt. 1-36, at 4, 9.

not apply to NSA contractors); *Union Oil Co. of Cal. v. Minier*, 437 F.2d 408, 411 (9th Cir. 1970) (“If the acts of the United States done within its power come in conflict with the powers of the state then the latter powers must give way, and this is true whether the United States exercises its rights directly or through the use of private persons.”).<sup>4</sup> Whether the Plaintiff Commissioners like it or not, Missouri’s CPNI rules could not operate to prohibit hypothesized federal national security-related activities that were permitted or required by federal law.

*Third*, for this reason, it is no response to argue that Plaintiffs are acting within a sphere of traditional state regulation. *See* Opp’n at 10-11. The Supreme Court has squarely held that, even when state governments act in an area that “[t]he several States . . . have traditionally regulated,” they “must give way if they impair the effective exercise of the Nation’s foreign policy.” *Zschernig v. Miller*, 389 U.S. 429, 440 (1968). Thus, Plaintiffs’ claim to be acting pursuant to their traditional authority to regulate the intrastate operations of telecommunications companies does not answer the question posed by this litigation but merely restates it. The question is whether that authority is being exercised in a way that intrudes into matters that are within the exclusive control of the federal government, such as the gathering of foreign intelligence to protect the country from attack. Because the Commissioners are attempting to use their authority under state law to examine and potentially punish what are claimed to be carrier activities associated with federal intelligence operations, they are acting beyond the lawful scope of their authority under the Constitution.

## **II. FEDERAL STATUTES PREEMPT PLAINTIFFS’ SUBPOENAS.**

Plaintiffs’ suit also must be dismissed because their claims are preempted by federal statutes, under both conflict and field preemption. Mot. to Dismiss 12-18. As an initial

---

<sup>4</sup> Plaintiffs make much of AT&T’s recognition that “‘not every state action that merely touches upon national security or foreign affairs is foreclosed.’” Opp’n at 5 (citing Mot. to Dismiss at 7). By no means is this a fatal “admission.” *Id.* Here, the intrusion into the exclusively federal sphere of national security is direct and substantial: the acknowledged purpose of the Plaintiffs’ subpoenas is to compel the disclosure of information concerning the alleged intelligence-gathering activities of the NSA that the federal government believes must remain secret in order to safeguard the effectiveness of its intelligence operations.

1 matter, Plaintiffs’ overall analysis is infected with the same mistaken view of state power  
2 that undermines their constitutional argument. Specifically, they argue that a “presumption  
3 against preemption” applies here, on the theory that “the state officials’ conduct relates to  
4 the regulation of intrastate telecommunications and public utilities.” Opp’n at 10 (internal  
5 quotation marks omitted). As set forth in our opening brief and above, however, under the  
6 Constitution, the federal government has sole charge of foreign intelligence. And, in a do-  
7 main of exclusive or traditional federal power, the presumption against preemption does not  
8 apply. *See United States v. Locke*, 529 U.S. 89, 108 (2000) (“The state laws now in ques-  
9 tion bear upon national and international maritime commerce, and in this area there is no  
10 beginning assumption that concurrent regulation by the State is a valid exercise of its police  
11 powers.”); *accord Ting v. AT&T*, 319 F.3d 1126, 1136 (9th Cir. 2003) (presumption against  
12 preemption does not apply where there is a “long history of federal presence”); *Bank of Am.*  
13 *v. City & County of S.F.*, 309 F.3d 551, 558 (9th Cir. 2002) (“the presumption is not trig-  
14 gered when the State regulates in an area where there has been a history of significant fed-  
15 eral presence”) (internal quotation marks omitted). It cannot be, as Plaintiffs would have it,  
16 that the mere invocation of “traditional state powers” is a trump card; were this true, the  
17 presumption against preemption would have applied in *Ting* (which concerned telecommu-  
18 nications regulation). Rather, the correct inquiry is “whether the local laws in question are  
19 consistent with the federal statutory structure, which has as one of its objectives a uniform-  
20 ity of regulation.” *Locke*, 529 U.S. at 108.

21 Here, the Commissioners’ effort to require AT&T to answer their questions about  
22 whether and how AT&T may have cooperated with alleged NSA requests for call records  
23 runs afoul of federal statutes in a number of respects. Most clearly, it conflicts with specific  
24 prohibitions on disclosure of NSA and intelligence-related information. *See Mot. to Dis-*  
25 *miss* at 12-14. Because this case involves preemption of the clearest sort, where compli-  
26 ance with both state demands and federal requirements is “a physical impossibility,” *Hills-*  
27 *borough County v. Automated Med. Labs.*, 471 U.S. 707, 713 (1985), the *Ting* case, on  
28 which Plaintiffs rely, Opp’n at 11-12, simply has no application.

1 Plaintiffs' arguments in response suffer from at least four fatal flaws. *First*, Plain-  
2 tiffs fail to demonstrate how their subpoenas may be complied with or enforced consistent  
3 with 18 U.S.C. § 798, which makes it a federal crime to disclose classified information re-  
4 lating to communications intelligence activities. Although Plaintiffs assert that they might  
5 be – on some unspecified “reading of the statute” and depending on unspecified future “cir-  
6 cumstances” – authorized to receive classified information, Opp’n at 13, these musings are  
7 just wrong: “The State Defendants have not been authorized to receive classified informa-  
8 tion concerning the communication intelligence activities of the United States in accor-  
9 dance with the terms of 18 U.S.C. § 798, or any other federal law, regulation, or order.”  
10 Compl. ¶ 38, *United States v. Gaw*, No. 07-1242, Dkt. 1-1, at 11; *see also id.* ¶ 37 (“The  
11 State Defendants have not been granted access to classified information related to the ac-  
12 tivities of the NSA pursuant to the requirements set out in Executive Order No. 12958 or  
13 Executive Order No. 13292.”). Their Application must be dismissed for this reason alone.<sup>5</sup>

14 *Second*, Plaintiffs' subpoenas conflict with § 6 of the National Security Act, which  
15 bars the compelled disclosure of information regarding NSA activities. *See* 50 U.S.C.  
16 § 402 note. Plaintiffs respond that § 6 is inapplicable because AT&T, not the NSA, is the  
17 direct target of their investigation. Opp’n at 14. As explained above, however, this is no  
18 answer, as AT&T's responses to the questions posed, even if they were flat denials, would  
19 reveal information that would help to confirm or deny the existence of an NSA call records  
20 program and whether AT&T is or has been a source of intelligence for any such program.  
21 The plain language of the statute broadly bars disclosure of “information with respect to the  
22 activities” of the NSA, irrespective of who furnishes it. 50 U.S.C. § 402 note; *see also*

---

23 <sup>5</sup> Plaintiffs suggest that the facts are too limited at this stage to determine whether preemp-  
24 tion applies. Opp’n at 11-12. But preemption is not a fact-bound inquiry; it depends upon  
25 a legal determination whether an action by the state conflicts with, or falls within a field  
26 reserved to, federal law. *See, e.g., Inland Empire Chapter of Associated Gen. Contractors*  
27 *of Am. v. Dear*, 77 F.3d 296, 299 (9th Cir. 1996) (“preemption is a legal question”); *see*  
28 *also Haw. Newspaper Agency v. Bronster*, 103 F.3d 742, 746 (9th Cir. 1996) (the “issue of  
whether a federal law occupies the field and thereby preempts state law is purely legal” (in-  
ternal quotation marks omitted)). In any event, even if facts were needed to demonstrate a  
conflict, those have been provided in the form of the declaration recently submitted by the  
Director of the NSA. *See* Alexander Decl., Dkt. 265 Att. 1, ¶¶ 16-20, at 8-11.

1 Statement of Interest of the United States in Supp. of Carriers' Mot. to Dismiss ("U.S.  
2 Statement of Interest"), MDL No. 06-1791, Dkt. 264, at 5-6. If Plaintiffs' argument were  
3 correct, § 6 could be easily circumvented through the simple expedient of seeking informa-  
4 tion from alleged NSA sources, rather than from the NSA itself. This is not what Congress  
5 had in mind when it mandated that "nothing" in "*any . . . law*" "shall be construed to re-  
6 quire the disclosure of the organization or *any* function of the National Security Agency, or  
7 *any* information with respect to the activities thereof." 50 U.S.C. § 402 note (emphases  
8 added).

9 *Third*, Plaintiffs maintain that there is no conflict because AT&T can comply with  
10 both federal and state law. Specifically, plaintiffs say they will end their investigation if  
11 "an authorized federal official has lawfully . . . instructed" AT&T that it cannot confirm or  
12 deny whether it disclosed any customer proprietary information. Opp'n at 17. This sugges-  
13 tion is puzzling, because, as Plaintiffs know, *see* Lane Letters, Dkt. 1-36, at 4, 9, AT&T has  
14 received just such an instruction. On July 11, 2006, the General Counsel of the Office of  
15 the Director of National Intelligence ("DNI") notified AT&T that "[c]ompliance with the  
16 subpoenas by [AT&T] would place [AT&T] in a position of having to confirm or deny the  
17 existence of information *that cannot be confirmed or denied* without harming national secu-  
18 rity." Powell Letter, Dkt. 1-37, at 1 (emphasis added). This is exactly the instruction that  
19 Plaintiffs claim to seek and to which they promise to defer. Yet it is also the precise in-  
20 struction that caused the Commissioners to file this lawsuit. Thus, unless the Commission-  
21 ers are signaling a willingness to abandon this suit, their suggestion that state and federal  
22 law can be harmonized in this way is illusory.

23 *Last*, Plaintiffs contend that even if their investigation "create[d] some tension with  
24 federal functions" regarding national security, any impingement would be "so slight as to  
25 be negligible." Opp'n at 13; *see also id.* at 19 (citing Plaintiffs' putative expert regarding  
26 "state or military secrets" and the "national security"). This assertion warrants no cre-  
27 dence. Although utility commissioners are authorized to "regulate public utilities," they are  
28 "not charged with evaluating threats to national security, investigating the NSA, or holding

1 businesses in contempt when their silence was mandated by the federal government.” *Ad-*  
2 *ams*, 473 F. Supp. 2d at 118. The Director of National Intelligence and the Director of the  
3 NSA, who do have responsibilities for evaluating the national security implications of dis-  
4 closures of information, do not agree that the impact on federal intelligence would be “neg-  
5 ligible.” As General Alexander has explained:

6           If it is confirmed that the United States is conducting a particular in-  
7 telligence activity, that it is gathering information from a particular  
8 source, or that it has gathered information by a particular method or  
9 on particular persons or matters, such intelligence-gathering activi-  
ties would be compromised and foreign adversaries, such as al  
10 Qaeda and affiliated terrorist organizations, could use such informa-  
tion to avoid detection. . . .

11           . . . Confirming or denying such information [regarding an  
12 alleged call records program] would disclose whether or not the  
13 NSA utilizes particular sources and methods. Such a disclosure  
14 would either compromise actual sources or methods or reveal that  
15 the NSA does not utilize a particular source or method, in either  
16 case providing information that could help an adversary evade de-  
tection. Confirming or denying the allegations regarding specific  
telecommunication companies and specific activities would also re-  
place speculation with certainty for hostile foreign adversaries who  
are balancing the risk that a particular channel of communication  
may not be secure against the need to communicate efficiently.

17 Alexander Decl., Dkt. 265 Att. 1, ¶¶ 17-18, at 8-9.

18           In addition to conflict preemption, Plaintiffs’ subpoenas are also preempted because  
19 they seek to enter into a field occupied by federal statutes. Through the enactment of  
20 CALEA, the Wiretap Act, the Stored Communications Act, and FISA, Congress has created  
21 an extensive and detailed statutory regime that governs telecommunications carriers’ assis-  
22 tance to federal authorities. *See* Mot. to Dismiss at 16-18.

23           Plaintiffs respond that these statutes “carve[] out an area of authority for state laws,  
24 state courts and/or state officials.” Opp’n at 14. This is true but irrelevant. AT&T has not  
25 argued that the states lack all authority over any subject touched by any of these statutes.  
26 On the contrary, statutes like the Wiretap Act cover carrier involvement with surveillance  
27 by both federal government officials and state and local officials, *see* S. Rep. No. 90-1097  
28 (1968), *as reprinted in* 1968 U.S.C.C.A.N. 2112, 2155-56, so of course these statutes refer

1 to state court proceedings and state law enforcement officers and preserve state jurisdiction  
2 over assistance provided by telecommunications carriers to state officials and activities.  
3 But just because Congress preserved state power to regulate surveillance activities involv-  
4 ing *state* officials, it does not follow that the states therefore have authority to regulate, in-  
5 vestigate, or oversee such activities in the context of *federal* surveillance. *See United States*  
6 *v. Hall*, 543 F.2d 1229, 1232 (9th Cir. 1976) (en banc) (“With the lone exception concern-  
7 ing interception by state officers for state prosecutions, the federal statute does not defer to  
8 the states.”). None of the provisions cited by Plaintiffs in any way suggests that state law  
9 may regulate or oversee carrier cooperation with federal activities or operations. In that  
10 field, federal law governs exclusively, and states are without power to act.<sup>6</sup>

11 **III. FEDERAL COMMON LAW PREEMPTS PLAINTIFFS’ SUBPOENAS.**

12 Plaintiffs’ Application also must be dismissed because enforcement of the subpoe-  
13 nas is preempted by federal common law. Mot. to Dismiss at 18-19. Plaintiffs do not dis-  
14 pute that federal common law displaces state law in areas of “uniquely federal interests,” or  
15 that foreign intelligence surveillance is such an area. *Id.* (internal quotation marks omitted);  
16 *see Opp’n* at 18-22. Indeed, Plaintiffs make no effort to distinguish *New SD, Inc. v. Rock-*  
17 *well Int’l Corp.*, 79 F.3d 953, 955 (9th Cir. 1996), where the Ninth Circuit held that the fed-  
18 eral interest in national security requires uniformity, and therefore federal law displaces  
19 state law in all “government contract matters having to do with national security.”

20 Instead, Plaintiffs respond by disputing whether the state secrets doctrine applies  
21 here. *Opp’n* at 18-22. This is a straw man. AT&T has not attempted to invoke the gov-  
22

---

23 <sup>6</sup> Plaintiffs’ insistence that field preemption is inapplicable because there remains a residue  
24 of state authority both mistakes the “field” at issue, as explained above, and appears to be  
25 based on a confusion between complete preemption and field preemption. *Opp’n* at 14  
26 (“Contrary to AT&T’s claims that each of these federal statutes completely preempts the  
27 state officials’ investigatory proceeding, each federal statute specifically carves out an area  
28 of authority for state laws, state courts and/or state officials.”). As this Court has noted,  
“[t]he concept of complete preemption . . . [is] irrelevant to [a] defendant[’s] field and con-  
flict preemption arguments.” *California ex rel. Lockyer v. Mirant Corp.*, 266 F. Supp. 2d  
1046, 1060 (N.D. Cal. 2003) (Walker, J.), *aff’d*, 375 F.3d 831 (9th Cir.), *amended on denial*  
*of reh’g*, 387 F.3d 966 (9th Cir. 2004); *see also* Mot. to Dismiss at 17-18 (collecting cases).

ernment's state secrets privilege (which it could not) or argued that the United States has done so (which it has not). Although the state secrets privilege likely forecloses any call records-based claims, *see Hepting v. AT&T Corp.*, 439 F. Supp. 2d 974, 997-98 (N.D. Cal. 2006); Mot. to Dismiss at 20 & n.13 (citing cases), as does the *Totten* bar, that is not the point. Rather, these common-law doctrines simply demonstrate "the uniquely federal nature of the interest in foreign intelligence activities and the independent preemptive force of federal law" at issue here, such that any gaps left by the statutes with respect to carrier cooperation with federal intelligence programs would be filled not by state law but by federal common law. Mot. to Dismiss at 19.

Plaintiffs respond that individual call records are not state secrets. Opp'n at 19. This would only matter if the focus of the subpoenas were on obtaining customer call records themselves. It is not. Rather, Plaintiffs seek the disclosure of information concerning the number, nature, dates, and original exchanges of any disclosures by AT&T to the NSA, as well as broad categories of documents relating to such disclosures. Subpoena Ad Testificandum ¶¶ 1-5, Dkt 1-3, at 8-9; Subpoena Duces Tecum ¶ 4, Dkt. 1-3, at 11-12. These disclosures would themselves necessarily reveal whether or not AT&T was involved in the sort of large-scale call records program that press reports have purported to describe, as well as whether any relationship exists between AT&T and the NSA. This is precisely the type of information whose disclosure could be expected to harm national security, as the United States has explained. *See* Mot. to Dismiss at 21 (discussing *El-Masri v. United States*, 479 F.3d 296, 309 (4th Cir. 2007)); U.S. Statement of Interest, MDL No. 06-1791, Dkt. 264, at 5; *see also* Powell Letter, Ex. E, Dkt. 1-37.<sup>7</sup>

---

<sup>7</sup> Plaintiffs also make the curious argument that AT&T violated *Totten* by arguing that enforcing the subpoenas could conceivably reveal the existence of a secret espionage relationship between AT&T and the NSA. Opp'n at 22-23. This is frivolous. It is Plaintiffs' subpoenas that put AT&T's purported involvement with the NSA at issue. *See, e.g.*, Subpoena Ad Testificandum ¶ 2, Dkt. 1-3, at 9. AT&T has never, and is not now, confirming or denying its participation in any alleged activities of the NSA. And even if AT&T had done so, that would not violate *Totten* any more than *Totten's* estate did in seeking to enforce his alleged espionage contract with President Lincoln. *Totten* is about the justiciability of particular disputes, not the conduct of parties.

1     **IV.     PLAINTIFFS DO NOT HAVE AUTHORITY UNDER STATE LAW TO EN-**  
2     **FORCE THE SUBPOENAS.**

3             Finally, AT&T has shown that only the Missouri PSC as a whole may enforce the  
4     investigative subpoenas at issue here, rather than the individual Commissioner Plaintiffs,  
5     who constitute only a minority of that body. Mot. to Dismiss at 21-24. In response, Plain-  
6     tiffs cite RSMo. § 536.077 without explaining how it applies, Opp’n at 24, and offer a read-  
7     ing of RSMo. § 386.130 that is unsupported by its text, *id.* at 25. Neither statute supports  
8     Plaintiffs’ claim to individual subpoena enforcement power.

9             Section 536.077 does not establish Plaintiffs’ authority to enforce these subpoenas  
10    because the statute, by its plain terms, applies only to subpoenas issued in “contested  
11    case[s].” RSMo. § 536.077. Plaintiffs have failed to refute AT&T’s showing that these are  
12    investigative rather than contested-case subpoenas, *see* Mot. to Dismiss at 21-22, and in-  
13    deed they have affirmatively and repeatedly conceded that their subpoenas are investiga-  
14    tive, Opp’n at 3-4; Sugg. in Supp. of Mot. for Remand, Dkt. 1-27, at 2; Reply Sugg. in  
15    Supp. of Pls.’ Mot. for Remand, Dkt. 1-67, at 1. Even if § 536.077 did apply, moreover, it  
16    requires enforcement by the PSC as a whole. *See* RSMo. § 536.077 (requiring that “[t]he  
17    agency . . . shall enforce” contested-case subpoenas (emphasis added)).<sup>8</sup>

18            Plaintiffs’ reliance on § 386.130 is equally unavailing. Far from permitting individ-  
19    ual commissioners to enforce investigative subpoenas, this statute reinforces Plaintiffs’ lack  
20    of enforcement power. *See* Mot. to Dismiss at 23. Section 386.130 authorizes individual  
21    commissioners to “undertake[]” an “investigation” or “inquiry,” including the power to *is-*  
22    *sue* subpoenas, but it does not authorize them to initiate judicial action to *enforce* subpoe-  
23    nas.<sup>9</sup> Rather, the power to enforce subpoenas is addressed in § 386.360.1, which grants this

24    <sup>8</sup> Although Plaintiffs may have *issued* their subpoenas pursuant to the authority granted to  
25    them in RSMo. §§ 386.320 and 386.420 to employ compulsory process, *see* Opp’n at 23-  
26    24, neither statute provides Plaintiffs with the power to have such subpoenas judicially *en-*  
27    *forced*. Such enforcement authority is vested in the Commission as a whole. *See* RSMo.  
28    §§ 386.360.1, 386.130; *infra* at 13.

29    <sup>9</sup> Nor does the provision state, as Plaintiffs imply, that any power of the Commission may  
30    also be exercised by an individual Commissioner. The provision, whose critical sentence  
31    Plaintiffs omit, states in relevant part:

32            *A majority of the commissioners shall constitute a quorum for the transac-*  
33            *tion of any business, for the performance of any duty or for the exercise of*

(continued...)

1 power to the commission as a whole. Mot. to Dismiss at 23. Neither the PSC nor individ-  
2 ual commissioners have inherent authority to enforce subpoenas, and any authority must be  
3 explicitly enumerated by statute. *See Brooks v. Pool-Leffler*, 636 S.W.2d 113, 121 (Mo. Ct.  
4 App. 1982), *recognized as abrogated by statute on other grounds, Gerlach v. Mo. Comm’n*  
5 *on Human Rights*, 980 S.W.2d 589 (Mo. Ct. App. 1998). Plaintiffs point to no statute ex-  
6 plicitly granting them power to enforce subpoenas individually, and § 386.360.1, which  
7 grants this power to the PSC as a whole, must be enforced by a majority of commissioners  
8 as required by § 386.130. *See RSMo. § 386.360.1; see also State ex rel. Philipp Transit*  
9 *Lines, Inc. v. Pub. Serv. Comm’n*, 552 S.W.2d 696, 701 n.4 (Mo. 1977) (PSC powers may  
10 only be exercised by a quorum). Plaintiffs, two of five PSC commissioners, do not satisfy  
11 this requirement.<sup>10</sup>

12 Contrary to Plaintiffs’ argument that this interpretation would render Missouri law  
13 superfluous and ineffective, Opp’n at 24, this is precisely the arrangement employed by the  
14 United States Congress. Subpoenas may be issued by individual committees or subcommit-  
15 tees, or sometimes their Chairmen, but enforcement requires a vote of the full House or  
16 Senate. Mot. to Dismiss at 23 n.15. Far from “illogical,” Opp’n at 25, this arrangement  
17 recognizes the dramatic difference between the power to demand information from some-  
18 one and the power to threaten them with imprisonment or other penal sanction for failure to  
19 comply. This two-tiered framework permits individual commissioners to move forward  
20 with investigations, including compulsory process, on their own, while recognizing that ju-

21 \_\_\_\_\_  
22 *any power of the commission . . . . Any investigation, inquiry or hearing*  
23 *which the commission has power to undertake or to hold may be under-*  
24 *taken or held by or before any commissioner. All investigations, inquiries,*  
25 *hearings and decisions of a commissioner shall be and be deemed to be the*  
*investigations, inquiries, hearings and decisions of the commission, and*  
*every order and decision made by a commissioner, when approved and con-*  
*firmed by the commission and ordered filed in its office, shall be and be*  
*deemed to be the order of the commission. (emphasis added)*

26 <sup>10</sup> Missouri law is clear that, when a statute specifies that an action be undertaken in a cer-  
27 tain manner or by a certain entity, this requirement must be strictly adhered to. *Cook v.*  
28 *Cook*, 97 S.W.3d 482, 486 (Mo. Ct. App. 2002); *Johnson Controls, Inc. v. Citizens Mem’l*  
*Hosp. Dist.*, 952 S.W.2d 791, 793 (Mo. Ct. App. 1997).

1 dicial action should not be undertaken without the accountability and majoritarian legiti-  
2 macy provided by a vote of the PSC as a whole.<sup>11</sup>

3 **CONCLUSION**

4 For the foregoing reasons, Plaintiffs' Application should be dismissed.

5 Dated: June 1, 2007

24 <sup>11</sup> Plaintiffs also make the obviously incorrect argument that this Court cannot dismiss on  
25 the basis of state law. Opp'n at 25 ("This matter . . . is one properly addressed by the State  
26 Courts of Missouri, and not appropriately raised in AT&T's Motion to Dismiss."). Plain-  
27 tiffs lost their motion to remand this matter to state court, Minute Entry, Dkt. 1-71, and they  
28 may not collaterally attack that ruling here. There can be no serious question that a federal  
court can dismiss a suit on state-law grounds. *E.g., Wigfall v. City & County of San Fran-*  
*cisco*, \_\_ F. Supp. 2d \_\_, 2007 WL 174434, at \*2 (N.D. Cal. filed Jan. 22, 2007) (Walker,  
C.J.) (dismissing harassment case on basis of state law immunity).
